

## **Benefits**

- Easily removes the contaminants that are otherwise almost impossible to remove without damaging the modules
- Developed specifically for PV modules and tiles
- No more scrapping reacts immediately with the contaminants and emulsions the particles
- Tested by TÜV Sud does not damage the ARC, silicone and aluminium frame
- Readily biodegradable and environmentally friendly
- Act preventively and protect the modules with one of our anti-static coatings to avoid the recurrent use of the Cement Removal Agent

**Applications** • PV panels, thermal solar panels, PV solar tiles, etc.
